## **BUSINESS PROFILE**

**Document Modified: April 2023**

### **Introduction**

Mishpacha Holdings (Pty) Ltd. (henceforth also referred to as Mishpacha Holdings or simply as Mishpacha) is a medium, 100% black South African plus majority woman owned and managed firm based in Gauteng Province, South Africa but operating throughout Africa and beyond.

The firm's principal purpose is to make a contribution to the South African, Africa and world economy by adding value to our clients' operations with strategic management, project management and engineering consulting services plus strategies, solutions and related services for mining, heavy engineering, clean energy and sustainable development. This is premised on the expertise and skills across these areas, which have been consolidated in-house, as well as our strategic business partnerships and alliances.

### **Vision**

Mishpacha Holdings will be the pre-eminent provider of strategy, solutions and related construction and consulting services in the areas of engineering, mining, energy, utilities and resources, IT governance, strategy consulting, project management and contracting services to general industry and government departments/agencies in South Africa, SADC, Africa and beyond.

### **Business Mission**

Mishpacha Holdings, is committed to growing our business and creating value for our shareholders, employees and society at large by taking advantage of the best technologies to develop and market our products and services. Our primary markets are in Africa but we intend positioning ourselves for SADC, South African and international markets with recognizable branding. We take seriously our responsibility to give back to our

mineral (manganese), we are an explorer and developer focused on the development of a near-surface manganese oxide deposits. We aim to produce high-purity electrolytic manganese metal (HPEMM), a key product needed for batteries in the expanding electric vehicle (EV) market.

Typically, our new ventures encompass the following:

- Sowing (select determine potential projects)
- Planting (determination of project implementing structure through to project completion)
- Nurturing (ramp up to achieve the designed capacity)
- Harvesting (full scale production)
- Commodity trading of manganese, and chrome.

**Engineering (Electrical, Mechanical, Civil, Chemical & Metallurgy)** – our vast exposure and experience in this field, in heavy industry and mineral processing, positions us well to offer our skills to clients on heavy industry operations, engineering and construction projects. The service would include related consulting, project management and planning, contract management and administration as well as provision of project engineering and construction resources.
